- **We successfully cancelled one duplicate order that Air France had placed (likely a double entry or later covered by existing stock). This clean-up on their side should streamline current inventories and will most likely have a positive impact on the coordination meeting with KLM in Paris on September 9, where both airlines are already aligned on exploring joint procurement and contract strategies**

KLM

Airline	KLM		Aircraft	TBC A350	11
Surface(s)	Vertical		Seat OEM	Stelia	
Design Stage	Certification	Commercial	Designer	Airbus	
Completed	Completed	Completed	Sub Contactors	TBC	

- **There is no update regarding the difficulties with MGR, but I will aim to resolve this during the September 9th meeting in Paris. Meanwhile, we will review the latest forecast today with Jason: KLM has projected a substantial material demand of around 2,500 linear yards over the next two years, which gives us a solid base and confirms that we are well positioned moving forward.**
- **Initial development testing performed by Kevin has shown unexpectedly high values for both heat release and smoke density, despite using the standard 914 texture. These results do not align with typical performance on standard Stelia stack-ups, so we will need to rerun the tests to better understand the cause. Further investigation is ongoing.**

Lufthansa group

Airline	Lufthansa (Voyager)		Aircraft	A350 /B748	37

Completed	In Progress	Completed	Sub Contactors		

- **No major updates this week. Most orders across the group have been processed and entered into the system, and all required quotes have already been issued. Looking ahead, we expect new POs specifically for Lufthansa (not the wider group) to be placed via Stelia, as the second wave of linefit programs begins. This will likely require material deliveries by end of this year or early next year. SFH will follow up directly with Stelia Program Management to ensure timelines are anticipated and properly supported.**

- **The situation has evolved. Following two recent discussions with Stelia, they confirmed they will use the Air France and China Airlines materials for the next aircraft. An update will follow once a decision is made.**
