

| Sales Report       |                                      |
|--------------------|--------------------------------------|
| Date(s):           | Monday July 22th - Friday August 8th |
| Locations Visited: |                                      |
| Sales Manager:     | Stephane Husser                      |

This week's report will be brief, as it follows more than ten days of holidays and coincides with the peak of summer holidays across Europe. Outside of some activity in the Middle East, most regions have been relatively quiet.

During my recent trip to Japan, I was able to gather valuable feedback on the recycling of Ultra Leather. Initial testing has been completed, and results appear promising. The key question now is how much oil can be recovered from the material we provided, and what the quality of that oil will be. ANA has taken the lead on assessing oil quality and has shown strong interest in purchasing sustainable aviation fuel (SAF) produced with this technology.

## Air France

|              |               |            |                |          |    |
|--------------|---------------|------------|----------------|----------|----|
| Airline      | Air France    |            | Aircraft       | B777     | 24 |
| Surface(s)   | Vertical      |            | Seat OEM       | Safran   |    |
| Design Stage | Certification | Commercial | Designer       | Multiple |    |
| Completed    | Completed     | Completed  | Sub Contactors | MGR      |    |

|              |               |            |                |          |    |
|--------------|---------------|------------|----------------|----------|----|
| Airline      | Air France    |            | Aircraft       | A350     | 38 |
| Surface(s)   | Vertical      |            | Seat OEM       | Stelia   |    |
| Design Stage | Certification | Commercial | Designer       | Multiple |    |
| Completed    | Completed     | Completed  | Sub Contactors | ACH      |    |

- **No new developments since the last report.**
- **We are still awaiting the coordination meeting to align sales and contract strategies between Air France and KLM.**
- **The meeting is scheduled for September 9th in Paris, with the aim of exploring more coordinated agreements between both airlines.**
- **Due to planned major strikes and events on September 10th, I will aim to return to the UK the same day to avoid potential travel disruptions.**

## KLM

|              |               |            |                |          |    |
|--------------|---------------|------------|----------------|----------|----|
| Airline      | KLM           |            | Aircraft       | TBC A350 | 11 |
| Surface(s)   | Vertical      |            | Seat OEM       | Stelia   |    |
| Design Stage | Certification | Commercial | Designer       | Airbus   |    |
| Completed    | Completed     | Completed  | Sub Contactors | TBC      |    |

- **KLM is currently reviewing the situation regarding the lack of information from MGR.**
- **Once they have completed their review, they will come back to us.**
- **Based on their annual material orders (estimated between 500 ly and 1,000 ly), the solution proposed by Karen should be an ideal fit, providing reassurance and resolving the issue.**
- **As soon as KLM responds, I will present Karen's tailored solution to them.**

## Lufthansa group

|              |                     |            |                |                    |    |

| Airline      | Qatar              |            | Aircraft       | 321             | 20+30+25 |
| Surface(s)   | Vertical + Seating |            | Seat OEM       | Stelia          |          |
| Design Stage | Certification      | Commercial | Designer       | Priestman Goode |          |
| Completed    | In Progress        | Completed  | Sub Contactors | TBC             |          |

- **Program activity continued during the holiday, but Stelia is now closed and unable to review any panels until reopening on September 1st.**
- **I held a call with Qatar, who expressed concerns about both pricing and timing.**
  - **Timing:** They require the two front panels to be completed by the end of this month, allowing installation and testing with reinforced panels at Stelia starting September 1st.
  - **Pricing:** Negotiations have begun. While we currently have the upper hand due to the lack of alternative solutions, I recommend proceeding cautiously and leveraging this position to build goodwill, particularly with the twin aisles project (120 aircraft) currently on order.

## Riyadh Air

|              |               |            |                |                 |    |

| Surface(s)   | Seat Covers      |            | Seat OEM       | Safran PEY+ Collins BC |    |
| Design Stage | Certification    | Commercial | Designer       | PG                     |    |
| Completed    | In process       | Completed  | Sub Contactors | Safran / Collins       |    |

- I had an excellent visit with Aamir, and we agreed that I would provide him with samples to work with and help move the project forward.
- We have scheduled a new meeting for September, this time with the whole team, and hopefully by then Aamir will be leading the team, which would give us an incredible edge.
- This would not only benefit us for vertical surfaces, but also for retrofit programs and seat covers, where Aamir is pushing hard for a synthetic version. He is determined to show Saudi's top management that synthetic materials are the way forward and that genuine leather is no longer the best choice for aircraft interiors.
- **Planning to contact Aamir and the team shortly to organize a potential visit in mid-September.**

## Etihad

|              |               |             |                |        |    |
|--------------|---------------|-------------|----------------|--------|----|
| Airline      | Etihad        |             | Aircraft       | A321   | 40 |
| Surface(s)   | Vertical      |             | Seat OEM       | Stelia |    |
| Design Stage | Certification | Commercial  | Designer       | JPA    |    |
| Not started  | Completed     | In Progress | Sub Contactors |        |    |

- **All pre-assigned part numbers requested by Catherine have been communicated. No feedback from her yet, but our part is complete.**
- **Lab dips are now completed and ready to be sent, enabling Catherine to begin her work.**
- **Will continue coordinating with Giacomo and push for new samples to be made beginning of September.**
- **Objective is to have all samples ready to present directly to the Etihad team during my September visit.**

## Emirates

|              |                         |            |                |          |    |
|--------------|-------------------------|------------|----------------|----------|----|
| Airline      | Emirates – 2S02 Linefit |            | Aircraft       | B777X    | 40 |
| Surface(s)   | Vertical                |            | Seat OEM       | SSFR     |    |
| Design Stage | Certification           | Commercial | Designer       | TBC      |    |
| Completed    | Completed               | Completed  | Sub Contactors | Multiple |    |

|              |                          |            |                |          |    |
|--------------|--------------------------|------------|----------------|----------|----|

| Surface(s)   | Vertical      |            | Seat OEM       | SSFR |           |
| Design Stage | Certification | Commercial | Designer       | JPA  |           |
| Completed    | Completed     | Completed  | Sub Contactors |      |           |

- We should retrieve some old material used by one of our historical customers to demonstrate its long-term performance in service. This could be useful not only for FlyDubai, but also for FlyNAS, Saudi, and Etihad.
- **Some back-and-forth on the accounting side regarding payments.**
- **I will review the situation with Juliet before she follows up with them.**
- **Payments appear to be slightly delayed, but we need to proceed carefully given the strong competitive push in the region.**

## FlyNas

|              |               |            |                |           |       |
|--------------|---------------|------------|----------------|-----------|-------|

| Surface(s)   | Vertical      |            | Seat OEM       | Optimares |       |
| Design Stage | Certification | Commercial | Designer       | Acumen    |       |
| Completed    | Completed     | Completed  | Sub Contactors |           |       |

- **Following the recent visit, I am still seeking written confirmation from Safran USA that we are certified on the Z200.**
- **Unclear if Yareli can provide this as an official letter or at least an email that can be forwarded to FlyNas.**
- **The goal is for FlyNas to have this certification information ready ahead of their upcoming visit to Safran (location TBD — USA or France).**
- **Plan is to exchange this letter for a piece of their current material so we can lab dip.**

## Turkish Airlines

|              |                  |            |                |                 |           |
|--------------|------------------|------------|----------------|-----------------|-----------|
| Airline      | Turkish Airlines |            | Aircraft       | TBC             | Up to 600 |
| Surface(s)   | Seat Cover       |            | Seat OEM       | TCI             |           |
| Design Stage | Certification    | Commercial | Designer       | Priestman Goode |           |
| Completed    | Completed        | Completed  | Sub Contactors | TBC             |           |

- The Royalux program remains unclear, with requirements shifting between heat release and vertical burn compliance.
- They sent test results for a BC5 treated material, expressed satisfaction with the outcome, and indicated they want to use it.
- Given their urgency, I advised them to place the PO for BC5, and we will move forward as quickly as possible.

## Kuwait Airways

|              |                |            |                |              |   |
