

Sales Report	
Date(s):	Monday June 23rd - Friday June 27th
Locations Visited:	
Sales Manager:	Stephane Husser

Air France

Airline	Air France		Aircraft	B777	24
Surface(s)	Vertical		Seat OEM	Safran	
Design Stage	Certification	Commercial	Designer	Multiple	
Completed	Completed	Completed	Sub Contactors	MGR	

Airline	Air France		Aircraft	A350	38
Surface(s)	Vertical		Seat OEM	Stelia	
Design Stage	Certification	Commercial	Designer	Multiple	
Completed	Completed	Completed	Sub Contactors	TBC	

- I have not received feedback yet regarding the expedite fees, but I have had confirmation that a group-level meeting will be organized with Air France and KLM purchasing. This meeting will take place in August or September, as Air France is not available to meet in July. The earliest opportunity is August, though this may be delayed to late August due to holidays.
- During the recent visit at Stelia, we learned that they are about to start the new version of the Air France program, which will bring important changes to our process. This development appears to have been triggered by the recent last-minute request for first-class material, which highlighted Air France's weak stock management and their delegation of ordering responsibility to Stelia. From now on, Stelia will handle ordering material, similar to what we see with Lufthansa.
- Jonas will be the program manager at Stelia for this project—he met with Kevin, Tyler, and myself this week. Jonas is enthusiastic about switching from BC3 to the standard treatment to reduce material consumption and to avoid the wrinkles that have been seen on the panels so far.

Airline	KLM		Aircraft	TBC Airbus	TBC
Surface(s)	Vertical		Seat OEM	Stelia	
Design Stage	Certification	Commercial	Designer	Airbus	
Completed	Completed	Completed	Sub Contactors	TBC	

- **As mentioned above, the new purchasing director responsible for our product at KLM is arranging a date for a meeting, either in Amsterdam or Paris, so we can discuss implementing the same prices across both Air France and KLM. Even if the meeting is scheduled for August, I suggest that Jason and I start assessing the sales impact of such a policy now. I do not expect a major impact, since we recently raised prices for Air France's standard products but kept bio products at a lower, though still significant, price. Since KLM does not have many bio products, the financial effect should be limited.**
- **During our visit to Stelia, I had the opportunity to meet with Geoffrey at the same time as our meeting with Isabel. Geoffrey confirmed that the materials for the coupons are ready and waiting to be shipped from Rochefort, they should be sent out very soon, either next week or the following one at the latest. This shipment will provide materials to cover most programs.**

Lufthansa group

Airline	Lufthansa (Voyager)		Aircraft	A350 /B748	37
Surface(s)	Vertical (BC+FC)		Seat OEM	Stelia	
Design Stage	Certification	Commercial	Designer	PG + Pearson Lloyd	
Completed	Completed	Completed	Sub Contactors	Multiple	

Airline	Lufthansa (Voyager)		Aircraft	B777X	20
Surface(s)	Vertical (BC+FC)		Seat OEM	Collins USA	
Design Stage	Certification	Commercial	Designer	PG + Pearson Lloyd	
Completed	In Progress	Completed	Sub Contactors		

- While we are still expecting new orders for October, I already received a follow-up from Stelia. Clément told me he is currently actively working on the latest version of the Airbus A350 fleet, which is now called Program 3. This is taking a lot of his time due to many small changes, but nothing is impacting our products, so we still have the same definition and the same materials will be used. I did warn him, however, that the 747 retrofit will be different, as new products will be installed, and since those are standard catalog products from the 9 series, it should actually make the certification process easier for him.

Swiss (completed)

Airline	Swiss		Aircraft	5	A350
Surface(s)	Vertical		Seat OEM	Collins - Stelia	
Design Stage	Certification	Commercial	Designer	PG + Pearson Lloyd	
Completed	Completed	Completed	Sub Contactors	TBC	

- Stelia confirmed that everything is running smoothly on their side. They finally asked if the situation was the same with the other supplier, most probably knowing that the situation at Collins is much worse and were waiting for confirmation, which we did provide during the visit 😊.

Austrian Airlines

Airline	Austrian		Aircraft	7	B777
Surface(s)	Vertical		Seat OEM	ZIM (PE) - + TBC 4 BC	
Design Stage	Certification	Commercial	Designer	Priestman Goode	
Completed	Not started	Completed	Sub Contactors	TBC	

- I just sent an email to Sarah this morning and will check to see if we might be able to tie in both productions. The email was mainly to demonstrate our proactiveness in offering the best prices, lead times, and quantities to Lufthansa. As I understand her original request matched the same need for the same program at ZIM.

Edelweiss

Airline	Edelweiss		Aircraft	A350	4
Surface(s)	Vertical		Seat OEM	ZIM (PE)	
Design Stage	Certification	Commercial	Designer	Priestman Goode	
Completed	Not started	Completed	Sub Contactors	TBC	

- No update last week.

Discover Airlines

Airline	Discover		Aircraft	8	A330
Surface(s)	Vertical		Seat OEM	ZIM (PE) - Stelia BC	
Design Stage	Certification	Commercial	Designer	Priestman Goode	
Pending	Not started	Completed	Sub Contactors	TBC	

- We had feedback from Amy on Monday, the 23rd, confirming that she had a meeting with Discover Airlines and they selected one material. The only thing left for us to do is provide the port number and the TDS for the material and the process will be complete.

Brussels

Airline	Brussels		Aircraft	10	A330
Surface(s)	Vertical		Seat OEM	ZIM (PE) - Stelia BC	
Design Stage	Certification	Commercial	Designer	Priestman Goode	
Completed	Not started	Completed	Sub Contactors	TBC	

- **We have received the approval for Brussels as well, so everything is now covered. We are launching new developments, and Morgane has accepted to receive smaller lab dips. Hopefully, these will be developed and sent next week, which should allow us to close the design stage. We already have a part number, so this is just an improvement on the existing definition and selection.**

Qatar

Airline	Qatar		Aircraft	777 + 787	178
Surface(s)	Vertical + Seating		Seat OEM	Adient	
Design Stage	Certification	Commercial	Designer	Acumen	
In Progress	In Progress	In Progress	Sub Contactors	TBC	

Airline	Qatar		Aircraft	321	20+30+25
Surface(s)	Vertical + Seating		Seat OEM	Stelia	
Design Stage	Certification	Commercial	Designer	Priestman Goode	
Completed	In Progress	Completed	Sub Contactors	TBC	

- **As most of you know, Qatar was unable to attend last week due to the bombing the day before departure, the closure of airspace, and the shutdown of operations. As a result, the meeting that was supposed to take place with them was postponed to next week. I am prolonging my stay in France in order to support them when they arrive. In the meantime, we have already been able to meet with the Stelia team and had a conference call, reviewing the product and panels with Qatar via Teams this past week.**
- **We also reviewed the panels as installed and discussed Qatar's requests for changes. First comment, the cabin is going to be beautiful, absolutely gorgeous, please note that this is not a suggestion to lay over in Doha when going to AIX26.**

Qatar (cont'd)

- The new definition has fewer areas to be wrapped, with most edges now captured either by a frame or a cushion, which will make that part easier. The initial comments from Stelia's team were very positive, they appreciated everything we have done for them and really liked how the material performed. I want to thank Kevin and Tyler, many of their solutions have been welcomed and adopted by Stelia. It was great to see Stelia's enthusiasm. One team member from Stelia even commented on how few remarks they had when the panels were first reviewed, which is unusual, as they typically have many more. For a first try, it was very positive and I believe it will help us secure more panel operations at Stelia in the future.
- Qatar now needs to change both the color of the material and the size and shape of the panels. It sounds like all these changes will be accepted, although Stelia was a bit reluctant initially, it seems everything will be approved during the upcoming visit. On the material color (BHC-SS), a new lab dip has been selected, but there are still discussions about making a slight adjustment. I expect the situation to be resolved next week once we have all the information. Unfortunately, with the new color selected, we do not have any material close to that shade. If Qatar needs material for the CDR mockup, our only options would be to attempt a color match using digital printing, or to request an extremely quick delivery from Asahi. The challenge, as discussed, is that Asahi tends to have trouble matching color from lab dip to production, especially under time pressure.

Riyadh Air

Airline	Riyadh Air		Aircraft	B787	39
Surface(s)	Vertical		Seat OEM	SSGB	
Design Stage	Certification	Commercial	Designer	Priestman Goode	
Completed	Completed	Completed	Sub Contactors		

- SFH will organize a visit to Riyadh Air as soon as the Qatar visit is complete and the situation in the Middle East becomes clearer.

Saudi

Airline	Saudi		Aircraft	A321 XLR	8 (15 total)
Surface(s)	Vertical + Seat covers.		Seat OEM	TAS (Vantage Solo)	
Design Stage	Certification	Commercial	Designer	Design investment.	
Completed	Completed	Completed	Sub Contactors		

Airline	Saudi		Aircraft	B787	39+ 10
Surface(s)	Seat Covers		Seat OEM	Safran PEY+ Collins BC	
Design Stage	Certification	Commercial	Designer	PG	
Completed	In process	Completed	Sub Contactors	Safran / Collins	

Airline	Saudi (retrofit)		Aircraft	A330	35
Surface(s)	Seat Covers		Seat OEM	Safran PEY+ Collins BC	
Design Stage	Certification	Commercial	Designer	PG	
Completed	In process	Completed	Sub Contactors	Safran / Collins	

- **Despite his heavy travel schedule, Tyler has managed to work on the design and will provide it to Bowes for approval and review either today or at the beginning of next week. Things seem to be on track from our side, though I am still not entirely clear on the situation at Collins.**

Etihad

Airline	Etihad		Aircraft	A321	40
Surface(s)	Vertical		Seat OEM	Stelia	
Design Stage	Certification	Commercial	Designer	JPA	
Not started	Completed	In Progress	Sub Contactors		

- **We are still searching for a United Airlines headrest cover. The situation at Collins remains unclear, and having the issue escalated by Etihad is not ideal. It would be perfect if we could demonstrate that Collins actually mixed both products when they raised concerns about the weight. If not, I was wondering how feasible it would be to cut a very small piece, maybe 10 centimeters by 10 centimeters, for each production and weigh them, so we can have our own quality data to present if needed. This way, we would be able to provide clear figures to support our position in these cases.**

Emirates

Airline	Emirates – 2S02 Linefit		Aircraft	B777X	40
Surface(s)	Vertical		Seat OEM	SSFR	
Design Stage	Certification	Commercial	Designer	TBC	
Completed	Completed	Completed	Sub Contactors	Multiple	

Airline	Emirates – 2S08 retrofit		Aircraft	B777	46
Surface(s)	Vertical		Seat OEM	SSFR	
Design Stage	Certification	Commercial	Designer	TBC	
Completed	Completed	Completed	Sub Contactors	Multiple	

- **We were unable to meet with ImaginAir while at Stelia this week, but I will make a quick visit to them next week.**
- **Our meeting with Carpenter was also postponed and will have to wait until the next opportunity, possibly in conjunction with a CDR review of the seats, though that's not yet confirmed.**

Emirates (Cont'd)

- **This morning, we received an interesting email from Emirates regarding what appears to be a late POs, at least from their perspective.**
 - **The numbers mentioned in their message do not make sense to me, so I will review this thoroughly with Robine today to get to the bottom of it.**
 - **I also want to be prepared to discuss this face to face with Emirates during my next visit.**
 - **This situation is actually a good opportunity to reach out to some contacts at Emirates we do not usually interact with, and to ensure everyone fully understands our process and the value we bring, which, in my opinion, is significant for Emirates. I want to make sure that message is clear in all upcoming discussions.**

Fly Dubai

Airline	FlyDubai		Aircraft	B737	Around 80
Surface(s)	Vertical		Seat OEM	SSFR	
Design Stage	Certification	Commercial	Designer	JPA	
Completed	Completed	Completed	Sub Contactors		

- **Adam and Jason to confirm if they can secure an old headrest cover in Promessa to present to FlyDubai.**

FlyNas

Airline	FlyNas		Aircraft	A330	15+15
Surface(s)	Vertical		Seat OEM	Optimares	
Design Stage	Certification	Commercial	Designer	Acumen	
Completed	Completed	Completed	Sub Contactors		

- **No news last week.**

Turkish Airlines

Airline	Turkish Airlines		Aircraft	TBC	Up to 600
Surface(s)	Seat Cover		Seat OEM	TCI	
Design Stage	Certification	Commercial	Designer	Priestman Goode	
Completed	Completed	Completed	Sub Contactors	TBC	

- We have received all the material needed to build the coupons, and the coupons are currently being made. They will be sent shortly to Testcorp for certification, which will be an important step with Turkish Airlines project.
- I believe we are starting to develop strong and frequent contacts between TAPIS and TCI, which is always a good sign of a healthy partnership, so the situation is progressing well on that side.
- During my visit at Stelia, I overheard a snippet of conversation between two Stelia employees where THY (Turkish Airlines) was mentioned. Although I was not able to catch the whole story, I will monitor the situation closely and check whether there is any work in progress, preparation underway, or upcoming projects at Stelia involving Turkish Airlines.

Kuwait Airways

Airline	Kuwait Airways		Aircraft	A330	7
Surface(s)	Vertical		Seat OEM	TAS	
Design Stage	Certification	Commercial	Designer	Factory	
Completed	Issues	Completed	Sub Contactors	TBC	

- We discussed the certification process with Clément at Stelia, and he admitted that Kuwait Airways hasn't really been a priority for them, he had trouble finding or even remembering the details.
- This also explains why there hasn't been much incentive or urgency from Stelia to work on the project.
- Still, we owe Stelia two linear yards of material to perform additional tests. We mentioned that simply changing the treatment might not be enough to pass certification, so I plan to have an off-the-record conversation with Clément to better understand exactly what Stelia wants.
- Stelia seems happy to use existing material from Air France, and China Airlines to move forward, but that raises questions on our end about what to do with the material we've already produced specifically for this program.

Air Calin

Airline	Air Calin		Aircraft	A350-900	2
Surface(s)	Vertical		Seat OEM	Stelia	
Design Stage	Certification	Commercial	Designer	Internal	
Completed	In Process	Completed	Sub Contactors	TBC	

- The program manager at Stelia confirmed that we will receive the requested material to perform the confidence tests.
- Since Air Calin opted for off the shelf material approach, I made sure to give him some background about the 9-series off the shelf option.
- Jonas was very interested and said this solution will be especially helpful for the smaller programs, where they can opt for off-the-shelf materials with proven performance on various stackups.
- We did have one issue on this program, the use of ultra-leather directly on Kydex 5555, but Clément, who was also at the meeting, confirmed that they will add some Aquabind to help it pass certification.

Air Mauritius

Airline	Air Mauritius		Aircraft	A350-900	3
Surface(s)	Vertical		Seat OEM	Stelia + Recaro	
Design Stage	Certification	Commercial	Designer	Airbus	
Completed	Completed	Completed	Sub Contactors	TBC	

- We will also receive material for confidence testing, and at the same time, we'll process the material according to Air Mauritius' request with our best guess for the products' treatment and ship it to Stelia.
- I'm convinced that while Stelia will receive the product, they will not launch any certification testing until they have the results from the confidence testing.
