On our side, we have the review on the 25th, 26th in Rochefort. So far the visit is still pending, and I should know more in the coming days, especially because of the recent events in Iran, which may jeopardize my trip if the situation escalates further.**

Completed	In process	Completed	Sub Contactors	Safran / Collins	

- **We had a call with PriestmanGoode and Bowes for the Collins mock-up. Actually, they informed us that the mock-up is not, as we thought, a mock-up for Collins. It is a separate mock-up because Collins failed their obligation to produce a realistic mock-up and most of the parts will be painted at that stage. Now, we also learned that on that action, Collins has requested to be able to look for other suppliers of panels beyond TAPIS. So, the commercial situation now lies with Collins and we are working further to provide materials to Bowes, but it is a very tight deadline.**

- **We are going to see two suppliers for Emirates by tying them in with the visit and the DDR for Qatar in Rochefort. The first one will be ImaginAir and the second one will be Carpenter. Carpenter is selected by Safran for most of the panels for the new LineFit A350s from Emirates. We're supporting ImaginAir, with their initial mockup. They have strong ties with Safran, which we can leverage strategically. ImaginAir is also assisting in replacing some current materials from E-Leather.**

Kuwait Airways

Airline	Kuwait Airways		Aircraft	A330	7
Surface(s)	Vertical		Seat OEM	TAS	
Design Stage	Certification	Commercial	Designer	Factory	
Completed	Issues	Completed	Sub Contactors	TBC	

- The certification process is still difficult. We have a lot of issues qualifying the texture. We have now received a request and quoted for alternative material below the MOQ to support Kuwait in the interim as none of the efforts seems to work. Stéphane still has not been able to make a formal appointment with Clément who is in charge of the certification for Kuwait.
- I will see if a meeting or informal discussion can happen after hours during the Stelia visit this week. We do have material that still hasn't shipped and cannot pass certification, so the solution remains unclear at this point.

Air Calin

Airline	Air Calin		Aircraft	A350-900	2
Surface(s)	Vertical		Seat OEM	Stelia	
Design Stage	Certification	Commercial	Designer	Internal	
Completed	Completed	Completed	Sub Contactors	TBC	

- We have had a conference call with Aircalin and Stelia and the Stelia program manager. We are basically still waiting for the materials to do the test, but have submitted our best guess of what the treatment should be at this point. Meeting planned during the visit to Stelia with the program manager for Aircalin.

Air Mauritius

Airline	Air Mauritius		Aircraft	A350-900	3
Surface(s)	Vertical		Seat OEM	Stelia + Recaro	
Design Stage	Certification	Commercial	Designer	Airbus	
Completed	Completed	Completed	Sub Contactors	TBC	

- **Most decisions should be finalized during this week's conference call, particularly for part numbers. As recommended by Kevin, we will evaluate an upgraded treatment instead of BC3, while also checking whether the standard treatment could still be viable for this program. I have had several calls with Jonas, who is the program manager, and Jonas is willing to take any further action, any steps to help us at Stelia to make the situation progress.**
