

Sales Report	
Date(s):	Monday May 5th - Friday May 9 th
Locations Visited:	
Sales Manager:	Stephane Husser

As I begin writing this report, I find myself reflecting on the rapidly evolving landscape we operate in—particularly the implications of the emerging connection between MGR and Perrone. With Perrone now having deep insider knowledge of TAPIS—including critical elements such as pricing and operational intricacies—the potential impact on our competitive position is significant. It is clear that, like anyone in my role, I have both the responsibility and the obligation to anticipate these shifts and help prepare our team accordingly.

While we can already identify some vulnerable points, it's essential that we think proactively, putting ourselves in their shoes to anticipate potential lines of attack. Known weaknesses such as MOQs—particularly for custom PNs—remain a recurring pain point, while the apparent success of 9th series stocking items reinforces a growing industry demand for more agile, readily available solutions.

Recurring concerns in our internal and external discussions—such as lead times, order quantities, and even flammability certification challenges—highlight the areas where we must improve. I would like to propose that we dedicate regular time, perhaps a few sessions each month, to collaboratively brainstorm how we can enhance our offering, better serve our customers, and stay one step ahead of the changes on the horizon.
